ABOUT ME

I am a third-year Computer Science student at RUPP with an interest in backend development. I have experience building web applications using Vue.js, API Consumption. I enjoy building real projects, solving problems, collaborating with others, and continuously improving my web development skills.

PERSONAL DETAIL

Name : Vong Vathana
Date of Birth : 25, May, 2006
Nationality : Cambodian
Languages : Khmer and English

EDUCATION

Royal University of Phnom Penh, 2024 - Present
Bachelor of Computer Science

- Relevant Courses:
- Web and Cloud Technology
 - Database Design and Management
 - Object-Oriented and Programming
 - Data Structure

SCHOLARSHIP

ANT TECHNOLOGY TRAINING CENTER

- Duration: 16 June 2025 - 17 July 2026
Funding: Sponsored by Ministry of Post and Telecommunications and CBRD Fund
Web Development Course:
- Frontend: HTML, CSS, Bootstrap, JavaScript, Vue.js, API Consumption
 - Backend: Node.js, Express.js, API Design, JWT Authentication, MVC Architecture
 - Extra Courses: C++, UX/UI Advanced Concepts, Cyber Security Fundamentals
 - Git GitHub Version Control Team Collaboration

Short Courses

- HTML+HTML5&CSS3

WORK EXPERIENCE

Project: Phsar Yerng
Academic Project Developer | at ANT Technology Training Center
Role: UX/UI Designer & Frontend Developer

- Organized design systems, components, colors, typography, and icons.
- Designed user interfaces using Figma.
- Improved user experience based on instructor and team feedback.

Project: ANTForum
Academic Project Developer | at ANT Technology Training Center
Role: Frontend Developer, UX/UI Designer & Hosting Server

SKILLS

Programming Languages:

- JavaScript
- C++
- SQL

Backend Development:

- Node.js
- Express.js
- RESTful API Development
- Authentication (JWT)
- API Integration

Frontend Development:

- HTML5
- CSS3, Bootstrap
- Vue.js
- Responsive Web Design

Development Tools

- Git & GitHub
- Postman

📘 [ANT Technology](#)

Responsibilities:

- Designed the UI/UX user experience and planned the frontend component architecture for the ANT Forum.
- Integrated RESTful APIs into the user interface using modern frontend frameworks (e.g., React.js, Vue, or Angular) to display and manage dynamic data.
- State Management using Pinia to create stores that manage global data (like user authentication, complex dashboard metrics) efficiently across application.
- API Integration: Connecting to backends (like Node.js/Express or Supabase) using tools like Axios or the native Fetch API within Vue's lifecycle hooks (e.g., onMounted).
- Application Deployment: Updating production environments on a Contabo VPS by pulling the latest code commits directly from GitHub repositories.
- Process Management: Utilizing PM2 within the aaPanel environment to restart backend services (such as Node.js applications), monitor application health, and ensure consistent uptime after updates.
- Collaborated with instructors and teammates to requirements and improve system functionality.

HOBBIES & INTERESTS

Passionate about learning backend development and building practical web applications. Enjoy creating projects, especially inventory management and POS systems with barcode scanning and KHQR payment integration, to strengthen my programming and problem-solving skills. Interested in exploring database design, RESTful APIs, secure authentication, and modern web technologies. I also enjoy collaborating with other developers, sharing knowledge, and continuously improving my technical skills through hands-on projects and learning new technologies.
